Gums, roots and metal screws

Thursday 19 June 2025

2 hours CPD

Development
outcome

Join us for a dynamic evening of expert insights on gums, roots and metal screws

Learning objectives

- Understand the benefits of CBCT compared to radiography
- Recognise how CBCT assists in identifying complex root canal anatomy
- Identify the role of CBCT in diagnosing root fractures and resorptive defects
- Diagnosing and managing the failing dentition
- Implant solutions to the failing dentition.

Prices
