

# Red flag in oral and maxillofacial surgery

## Root resorption vs restorative approach and Branch AGM

Friday 16 May 2025

5 hours CPD

Development  
outcome

**Gain insights into modern OMFS treatments, evolving practices and the latest in tooth resorption diagnosis and management.**

### Aim

Explore modern treatment options and the evolving scope of OMFS to improve patient care. Get an up to date overview of diagnosis and management of tooth resorption.

### Learning objectives

- To understand the typical clinical presentations to OMFS through dental practice
- To gain knowledge of the evolving scope of practice in OMFS and available treatments
- To discuss treatment approaches based on resorption types
- To demonstrate the importance of CBCT scan for resorption diagnosis.

### Speakers

**Anna Bate**

Specialist Endodontist

**Birute Bond**

Specialist Prosthodontist and Implantologist

**Alexander Goodson**

Consultant Maxillofacial, Head and Neck Surgeon, Queen Alexandra Hospital

### Timings

09:00 Registration

12:15 Lunch and AGM

16:00 Close

### Price
