

Dundee and Perth Section Introduction to periodontal surgery in the management of periodontitis

Tuesday 8 April 2025

Development outcome 

This session will outline how periodontal surgery fits into the overall management of periodontal disease, explore the types of periodontal surgery, and discuss how to optimise patients for periodontal surgery through effective non-surgical management.

Learning objectives

- Understand the role of periodontal surgery in the management of periodontitis
- Gain a clearer understanding of the indications for periodontal surgery
- Understand the criteria for selecting patients who are suitable candidates
- Learn about the various types of periodontal surgery.
