

Treating the curved, the calcified and the ledged using ProTaper Ultimate

4 hrs 30 mins CPD

Friday 31 May 2024 | 09:15-15:15

Development outcome **A** **B** **C** **D**

Hands-on workshop for the general dentist

Aim

The day will outline the relevant evidence base and clinical implications of rotary endodontic treatment with clinical tips on managing curved, calcified and ledged canals.

The workshop will develop the skills you need to carry out optimal endodontic treatment utilising the Protaper Ultimate rotary in curved, calcified and ledged canals.

Learning objectives

- Review the aetiology for calcifications and ledges
- Identify the severity of curvatures, calcification and ledges
- Describe techniques to overcome curved calcified and ledged canals
- Review a novel hand filing technique which involves reduction the number of hand files before using rotary files.

Venue

University of Central Lancashire,
Preston PR1 2HE

Meet the speakers

Omar Ikram

Specialist Endodontist

Shalini Kanagasingam

Specialist Endodontist,
Senior Clinical Lecturer and
Course Leader, UCLan
