

Implant emergency management for the GDP

Thursday 3 July 2025

1 hr 30 mins CPD

Development outcome **A** **B** **C** **D**

Aim

This session will provide GDPs with the knowledge and skills to effectively manage emergencies related to dental implants. It will ensure GDPs are able to identify, prevent, and respond to potential implant-related complications in a timely and professional manner.

Learning objectives

- Identify common implant-related emergencies such as implant failure, peri-implantitis, and mechanical complications
- Understand the underlying causes of these emergencies, including surgical and prosthetic factors
- Diagnose and assess the severity of implant complications based on clinical examination and radiographs.

Venue

Village Hotel, Swansea SA1 8QY

Speaker

Rhian Jones

Specialist Oral Surgeon

Price

BDA member: Free
