

Kingston and District Section

Designing the future of medicine

Tuesday 11 February 2025

Join us for a lecture introducing the basic concepts of CAD (computer-aided design) and 3D printing technologies!

Learning objectives

- Explore the applications of 3D printing in healthcare with a focus on dental applications
- Explore some examples of 3D printing in the hospital setting
- Discuss the impact and benefits of CAD, 3D printing and the new care pathways
- Discuss the future trends in 3D printing including the regulatory aspects.

Speaker

Chris Donaldson
Consultant Orthodontist,
Kingston Hospital

Prices

BDA members - FREE
Non-members - £19
DCPs - £16
