

Digital dentistry made simple: enhancing precision and efficiency in everyday practice and Branch AGM

Wednesday 26 March 2025

1 hour 30 mins CPD
Development outcome (A) (B) (C) (D)

This lecture explores how digital dentistry simplifies treatment, improves diagnostics and enhances patient communication through intraoral scanners and digital workflows.

Aim

Understand digital dentistry and its applications in general practice. The session will highlight the benefits of intraoral scanners and digital workflows in treatment planning, diagnostics and case execution.

Learning objectives

- Understand the fundamentals of digital dentistry and its impact on modern dental practice.
- Identify the key advantages of intraoral scanners in restorative, cosmetic and implant dentistry.
- Learn how digital workflows enhance case acceptance, treatment accuracy and patient experience.
- Recognise the challenges and practical steps involved in transitioning from conventional methods to digital workflows.
