

Aim

To provide an overview of the management of oral surgery patients, including complex medical and surgical needs, helpful tips for GPDs carrying out surgical extractions, management of surgical complications and referral pathways.

Learning objectives

- Manage complex patients for oral surgery: anticoagulants, bisphosphonates/anti resorptive/anti angiogenic agents, steroids, cardiac patients and TMD
- Feel more confident when undertaking surgical extractions using the helpful tips provided
- Manage surgical complications: tooth fracture, tuberosity fracture, OAC and bleeders
- Access referral pathways.
