

Neurodiversity, learning disabilities and autism

Wednesday 19 March 2025

1 hour 30 mins CPD

Development outcome (A) (B) (C) (D)

Explore training requirements for neurodiversity, learning disabilities and autism, including legal obligations and necessary adjustments for patient care

Aim

To improve knowledge of the mandatory training requirements with regards to neurodiversity, learning disabilities and autism. To understand what is meant by learning disabilities and what adjustments may be needed made when treating patients.

Learning objectives

- Understand what autism is and recognise what adjustments may be required when treating a patient with autism
- Understand what is meant by 'learning disability'
- Understand all the different forms of neurodiversity
- Understand the term 'reasonable adjustments' and how these can be implemented within the dental practice.

Speaker

Samantha Paterson
