

Ill by mouth?

Exploring the links between periodontitis and general health and periodontitis and dental implants

And Branch AGM

Wednesday 12 November 2025 | 13:30-17:00 | Edinburgh

Examine links between periodontitis, general health and dental implant outcomes and how these relationships influence treatment planning in general practice.

Learning objectives

- Study evidence for link between periodontitis and general health
- Equip practitioners to discuss link between periodontal and general health with patients and colleagues.
- Explore factors and provide a framework for deciding whether to retain or extract periodontally affected teeth
- Examine implant challenges in advanced periodontitis and how tooth loss timing impacts treatment feasibility.

Venue

Royal Scots Club
29-31 Abercrombie Place
Edinburgh EH3 6QE
