

Top tips for managing dental trauma in general practice

1 hr 30 mins CPD

Thursday 27 February 2025

Development outcome **(A)** **(B)** **(C)** **(D)**

Aim

This lecture aims to highlight the essential aspects of dental trauma management, as well as appropriate online resources available to the dental team and public.

Learning objectives

- Understand how to carry out a thorough clinical examination of the face, soft tissues and teeth
- Be able to make a correct dental trauma diagnosis and manage cases at the acute stage
- Be able to carry out appropriate clinical follow-up and long-term management
- Be aware of the considerations for prompt referral and referral to secondary care for long term management of high complexity cases.

Timings

- 18:30 Registration and light refreshments
19:00 Lecture starts
20:30 Close
